As we understand that the Project is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor, Mr Le Thanh Nhan and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowndge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 01.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us front-end or back-end technology but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of Semester II, as well as special subjects those are Java and PHP. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a world that brings everything about the potteries and crockeries into your experience.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

Review 01

Design Plan: Online Bookstore	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 21-03-2023	Version 1.0	Page No: 1 of 54

Problem Definition

Papyrus.com offers huge collection of books in diverse category of Fiction, Non-fiction, Biographies, History, Religions, Self -Help, Children. We also sell in vast collection of Investments and Management, Computers, Engineering, Medical, College and School text references books proposed by different institutes as syllabus across the country. Besides to this, we also offer a large collection of E-Books at very fair pricing.

We attempt to extend the customer satisfaction by catering easy user-friendly search engine, quick and user-friendly payment options and quicker delivery systems. Upside to all of this, we are disposed to provide exciting offers and pleasant discounts on our books.

- ✓ Provide function for member register.
- ✓ Provide information of the product to customers and members.
- ✓ Provide shopping cart function so customers and members can order products.
- ✓ The member can take their Privacy through Member Control Panel (MCP)
- ✓ Receive comments and ratings from customers and members to improve service quality as well as product quality.

An Admin Control Panel (ACP) that support about management system:

- ✓ Administrators the ability to add, update product information quickly and accurately.
- ✓ Administrators the ability to manage members and their feedback, comment or rating.
- ✓ Administrators the ability to manage delivery progress belong to orders.
- ✓ Administrators the ability report statistics.

The Role of User and Admin:

User:

input:

- Member registration data.
- Order's selected products.
- Feedbacks about products

Process:

- Search products from database by categories, by product types.
- Process customer registration information.
- Process product's feedback.
- Process customer orders.

Output:

- Notification of successful registration / failure.
- Product information.
- Notification of successful making order.

Webmaster:

input:

- Administrator login data.
- Product and category data to add / edit / delete.
- Member data to be search / delete.
- Order data to be search / approve.

Process:

- Add / edit / delete products.
- View information of all members.
- Change member account's status.
- View all orders.
- Update order status.

Output:

- Notification to add / edit / delete products success / failure.
- Notification to change member account's status.
- Notification to update order's status.

III. User page

1. Edit profile

The screenshot shows the 'Edit profile' page for a user named 'user1'. The page layout includes a header with navigation links (HOME, PRODUCTS, CATEGORIES, COUNTRY, PUBLISHED, USER1) and a user profile section. The profile section contains a circular profile picture placeholder with the text '128 x 128' and 'Upload a different photo'. Below this is a button that says 'Chọn tệp không có...ược chọn'. The profile details are as follows:

- Username: user1
- Email: user1@gmail.com
- Gender: Male
- Birthday: dd/mm/yyyy
- Phone: 0823080179
- Location: Gò Vấp TPHCM
- Bio: (empty field)

There are three password fields: Current Password, New Password, and Confirm Password, each with a masked input field. At the bottom right, there are two buttons: 'SAVE CHANGES' and 'CANCEL'.

2. Order history

The screenshot shows the 'Order history' page for a user named 'USER2'. The page features a table with the following columns: ID, Preview, Number of Products, Total Price, Status, Order Time, and Option. The table contains three orders:

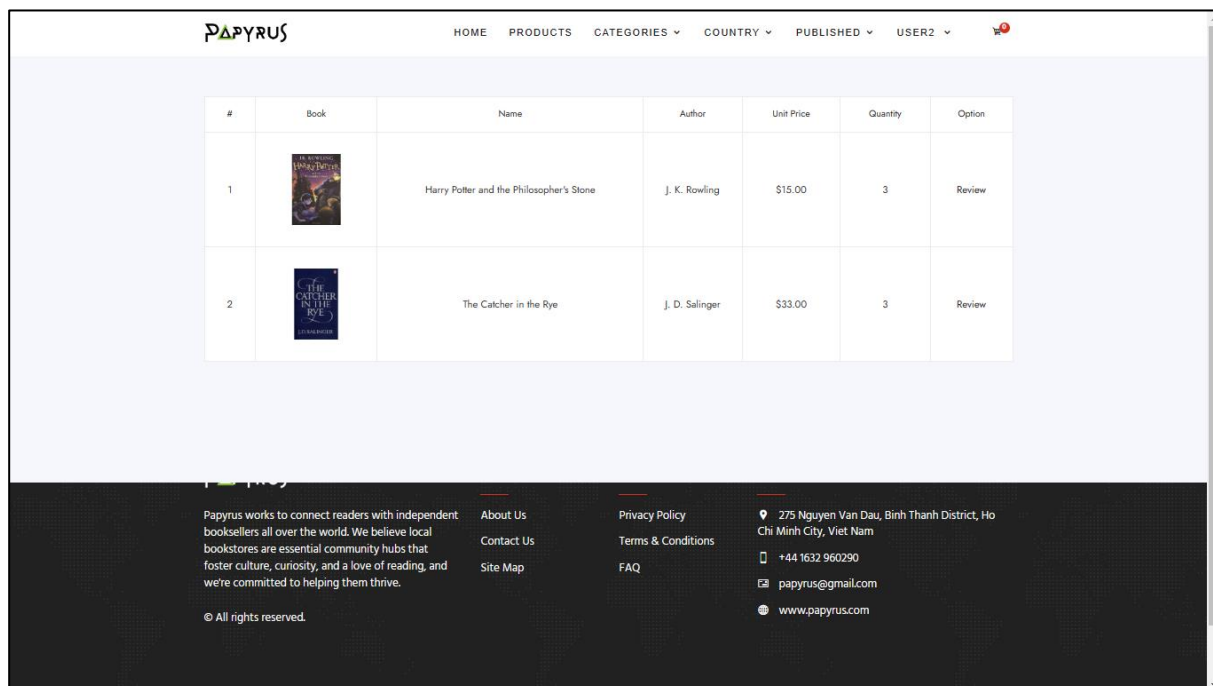

ID	Preview	Number of Products	Total Price	Status	Order Time	Option
1		1	\$23	Cancelled At: 2023-04-09 19:36:06	2023-04-10 02:24:31	Details Cancel
2		2	\$144	Processing	2023-04-10 02:26:01	Details Cancel
3		1	\$165	Cancelled At: 2023-04-10 03:49:15	2023-04-10 10:48:06	Details Cancel

The page also includes a 'Date ascending' dropdown menu and a footer with the text '© All rights reserved.'.

ORDER

Description : this page contains all customer's order information like: photo, name, price, quantity, coupon, total of all the products that customers "add to cart" from product pages. Coupons can be applied if they haven't been used and still valid. Customer must confirm their phone numbers and address, they will auto-appear in the box if customer has provided in their profile before otherwise they have to type in by themselves and the information will be auto-saved to the customer's profile.

5. Feedback Table Controller

The screenshot shows the Papyrus Admin interface. The sidebar on the left contains navigation links: Overview, User Tables, Product Tables, Order Tables, and Feedback Tables (which is highlighted). The main content area is titled 'Feedback Tables' and displays a table with 4 entries. The table has columns: ID, Username, Product, Rating, Description, Created_at, and Status. The entries are as follows:

ID	Username	Product	Rating	Description	Created_at	Status
1	user1	Don Quixote	5	This is so cool! i love it	2023-04-06 22:44:59	
2	user2	Don Quixote	4	This is not good in my expectations	2023-04-06 22:44:59	
3	user1	Harry Potter and the Philosopher's Stone	5	excellent!	2023-04-07 02:33:08	
4	user2	Harry Potter and the Philosopher's Stone	5	Very interesting books and excellent service.	2023-04-11 10:57:23	

Below the table, it says 'Showing 1 to 4 of 4 entries'. There are 'Previous' and 'Next' buttons. Below this is the 'Reply Tables' section, which currently shows 'No data available in table'.

Description : this page contains all function like: view, edit, add, delete for admin to control database tables.

Effective Date: 21-03-2023	Version 1.0	Page No: 47 of 54

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12	Is the navigation sequences correct through all the Web pages on the site?	
13	Is the JavaScript code working as expected in all click events?
